

INDEX TO VOLUME 32

Absorption, The, of staphylococcus bacteriophages.....	505
Actinomyces-like, The, nature of a recently described "unidentified yellow pigment-producing coccus." Abstract.....	127
Action, The, of hexamethylenetetramine on members of the colon and aerogenes groups.....	281
Adsorption of bacteria in salt lakes.....	11
Aerogenes groups, The action of hexamethylenetetramine on members of the colon and.....	281
Agglutinative action of normal human and animal serums on the paradysentery bacilli. Abstract.....	470
Alberta, <i>Clostridium botulinum</i> type C in relation to duck sickness in the Province of.....	79
Alberts, J. O., Shaughnessy, H. J., Hall, N., and Friewer, F. Experiences with special methods in the isolation and identification of typhoid bacilli from blood, feces and urine. Abstract.....	128
Alkaline solutions, Bacteriological approach to problem of interconversion of hexoses in.....	175
Ammonia-oxidizing bacteria, The pure culture isolation of.....	653
Anaerobes, Curdled blood. Simply prepared fluid medium for cultivation of.....	131
—, sporulating, Semisolid media for cultivation and identification of.....	135
Anaerobic bacteria associated with experimental pulmonary abscess. Abstract.....	470
Analytic, An, schema for experiments with the bacterial cell as contrasted with the methods of restricted empiricism. Abstract.....	118
Anderson, R. J. Chemical studies on the wax-fractions of the tubercle bacillus. Abstract.....	356
Anhydrides, The utilization of sugar alcohols and their, by various microorganisms. Sugar alcohols. V.....	499
Antibody and immunity in poliomyelitis. Abstract.....	469
Antigenic relationships of some tubercle bacilli as determined by serological reactions with the natural tuberculins. Abstract.....	466
Antitoxic response in guinea pigs immunized with tetanus alum-precipitated toxoid followed by tetanus spores. Studies on tetanus toxoid. III....	33
Antonoff, N. I. and Karpoff, S. P. The spread of tularemia through water, as a new factor in its epidemiology.....	243
Ascorbic acid (Vitamin C) content of lima beans as affected by shipping, freezing and canning. Abstract.....	359
Attempts to increase the heat resistance of bacterial spores.....	589
Atypical, An, meningococcus isolated from cerebrospinal fluid in the Calcutta meningitis epidemic of 1934-35.....	293

<i>Bacillus mycoides</i> , Bacteriophagy of, with reference to effect on dissociation and transmission by spores.....	195
Bacteria, Adsorption of, in salt lakes.....	11
—, Changes in the electrokinetic potential of, at various phases of the culture cycle.....	433
— fibrinolysins. Abstract.....	470
—, Growth and fermentation of, near their minimum temperature.....	485
—, Sonic energy as a lethal agent for yeast and.....	361
—, Studies on cultural requirements of. VIII. Utilization of glutamic acid by diphtheria bacillus.....	207
Bacterial cultures, A study of methods for the determination of reducing sugars in.....	1
— growth at constant pH. Apparent oxidation-reduction potential, acid production, and population studies of <i>Lactobacillus acidophilus</i> under anaerobic conditions.....	567
— —, Ultra-violet irradiated carbohydrates and.....	75
— population of the sea, Correlative studies of microscopic and plate methods for evaluating the.....	423
— populations, The estimation of, with the aid of a photoelectric densitometer.....	307
— spores, Attempts to increase the heat resistance of.....	589
Bactericidal, The, and photochemical properties of irradiated cod liver oil and an ozonide of olive oil.....	47
Bacteriological approach to problem of interconversion of hexoses in alkaline solutions.....	175
Bacteriological media, The preparation of silicic acid jellies for.....	639
— problems of canning industry. Abstract.....	466
Bacteriology as an aid to the milk industry. Abstract.....	128
—, The, of chronic ulcerative colitis. Abstract.....	129
Bacteriophage in the rhizobia. Abstract.....	470
Bacteriophages, The absorption of staphylococcus.....	505
Bacteriophagy of <i>Bacillus mycoides</i> with reference to effect on dissociation and transmission by spores.....	195
Bailey, G. Howard and Raffel, Sidney. Studies on the antibody response in infectious mononucleosis. Abstract.....	471
Baldwin, I. L. and Reid, J. J. The infective ability of rhizobia on the soybean and cowpea cross inoculation groups. Abstract.....	117
Baldwin, I. L., Saudek, E. C., and Colingsworth, D. R. Nitrogen relationships in yeast growth. Abstract.....	118
Barnes, L. A. and Wight, Eleanor C. The spontaneous transformation of pneumococcus type V to type II.....	557
Bauguess, Lyle C. The influence of optical activity on the utilization of tryptophane for growth by the diphtheria bacillus.....	299
Baumgartner, John George. Ultra-violet irradiated carbohydrates and bacterial growth.....	75
Beard, P. J. Longevity of typhoid bacilli in the soil. Abstract.....	471
Beavens, E. Arthur, Pederson, C. S. and Goresline, Harry E. Pasteuriza-	

- tion of juices or musts prepared from several varieties of grapes. Abstract..... 360
- Beck, Frances F., Dozois, K. Pierre, Carr, C. Jelleff, Krantz, John C. Jr., and Hachtel, Frank. Sugar alcohols. V. The utilization of sugar alcohols and their anhydrides by various microorganisms..... 499
- Becker, Elery R. and Morehouse, Neal F. "Vitamin G" in coccidian infection. Abstract..... 121
- Beckwith, T. D. and Weaver, C. E. Sonic energy as a lethal agent for yeast and broth..... 361
- Bergey, David H. Genus *staphylococcus*. Abstract..... 357
- Berry, George P. and Dedrick, Helen M. Further observations of the transformation of the virus of rabbit fibroma (Shope) into that of infectious myxomatosis (Sanarelli). Abstract..... 356
- Berry, George P. and Sylverton, Jerome T. Coexistent infections of individual cells by more than one filterable virus. Abstract..... 356
- Bieljansky, F. M., Rubentschik, L., and Roisin, M. B. Adsorption of bacteria in salt lakes..... 11
- Bloom, W., Kharasch, M. S. and Conway, E. A. Chemical factors influencing growth and pigment of microorganisms..... 533
- Bollen, W. B. Microorganisms and phytamins in relation to plant growth. Abstract..... 470
- Bond, V. S. and Wilson, P. W. Studies on the mechanism of nitrogen fixation by leguminosae. The pO_2 function. Abstract..... 116
- Borden, A. G. and Jungherr, Erwin. Serological types of salmonella isolated from paratyphoid in chicks. Abstract..... 127
- Boruff, C. E. Practical applications of fermentology in the distilling industry. Abstract..... 128
- Bowen, Marion, and Gillespie, Hazel B. The actinomyces-like nature of a recently described "unidentified yellow pigment-producing coccus." Abstract..... 127
- Brilliant green bile medium, A critical study of some of the growth-promoting and growth-inhibiting substances present in..... 375
- containing sodium formate, Increased growth and gas production by *Escherichia-aerobacter* organisms in..... 385
- Bronfenbrenner, J. and Hershey, A. D. The influence of the composition of the medium on the metabolism of slow lactose-fermenting bacteria of intestinal origin..... 519
- Brucellosis. Abstract..... 672
- Brumbaugh, Arthur. A study of an atypical case of typhoid fever. Abstract..... 673
- Buffered blood cultures. Abstract..... 121
- Burke, Victor and Taschner, Leslie. Growth of *Escherichia coli* in a small amount of organic matter. Abstract..... 124
- Calcutta meningitis epidemic of 1934-35, An atypical meningococcus isolated from cerebrospinal fluid in the..... 293
- Carbohydrate utilization by *Mycobacterium tuberculosis*, Glycerol and..... 599
- Carbohydrates, Ultra-violet irradiated, and bacterial growth..... 75
- Carbonaceous materials, The extent of oxidation of. Physiological studies on rhizobium. IV..... 183

Carel, Hubert C. A water soluble form of alpha-naphthol and its inhibitive action upon the intestinal flora of the human subject. Abstract.....	358
Carpenter, Charles M. and Warren, Stafford L. Gonococcal infection. 1. Diagnosis by the cultural method. 2. Fever therapy motion pictures. Abstract.....	357
Carr, C. Jelleff, Dozois, K. Pierre, Krantz, John C. Jr., Hachtel, Frank and Beck, Frances F. Sugar alcohols. V. The utilization of sugar alcohols and their anhydrides by various microorganisms.....	499
Cell inclusions in neisseria. Abstract.....	119
Central New York State Branch, S.A.B. Proceedings.....	355
Central Pennsylvania Branch, S.A.B. Proceedings.....	672
Cerebrospinal fluid, An atypical meningococcus isolated from, in the Calcutta meningitis epidemic of 1934-35.....	293
Changes in the electrokinetic potential of bacteria at various phases of the culture cycle.....	433
Chapman, George H. Specificity of dye in crystal-violet agar reaction of staphylococci.....	199
— Studies of streptococci. IV. Resistance of enterococci.....	41
Charlton, D. B. Germicidal properties of chronic compounds. Abstract..	470
— Occurrence and significance of <i>Lactobacillus thermophilus</i> in pasteurized milk. Abstract.....	470
Chemical and immunological relationships between the proteins from different acid-fast bacilli. Abstract.....	671
— factors influencing growth and pigment of microorganisms.....	533
— Studies on the wax-fractions of the tubercle bacillus. Abstract.....	356
Chemoprophylaxis of poliomyelitis. Abstract.....	468
Clark, Paul F. and Ellingson, Harold V. The effect of artificial fever on the development of antibodies. Abstract.....	120
— and Preston, William S. Further attempts to produce poliomyelitis by the gastro-intestinal route. Abstract.....	120
—, Wesley M. and Hoffstadt, Rachel E. Methods of chemical analysis of <i>Staphylococcus aureus</i> . Abstract.....	470
Clifton, C. E. Influence of peptone concentration on the metabolic activities of <i>Escherichia coli</i> . Abstract.....	470
Clinical manifestations of bacteria sensitivity. Abstract.....	239
<i>Clostridium botulinum</i> type C in relation to duck sickness in the Province of Alberta.....	79
— <i>capitovialis</i> , Mechanism of the non-specific serum agglutination of the obligate anaerobes <i>Clostridium paraputrificum</i> and.....	411
— (Snyder and Hall), The serologic agglutination of the obligate anaerobes <i>Clostridium paraputrificum</i> (Bienstock) and.....	401
— <i>paraputrificum</i> and <i>Clostridium capitovialis</i> , Mechanism of the non-specific serum agglutination of the obligate anaerobes.....	411
— (Bienstock) and <i>Clostridium capitovialis</i> (Snyder and Hall), The serologic agglutination of the obligate anaerobes.....	401
Coca, A. F. and Little, P. A. The standardization of the toxins and antitoxins of the pneumococcus. Abstract.....	588
—, Little, P. A., Lyon, B. M. and Voigt, E. F. Study of the toxins of the pneumococcus. Abstract.....	588

Cod liver oil and an ozonide of olive oil, The bactericidal and photochemical properties of irradiated	47
Coexistent infections of individual cells by more than one filterable virus. Abstract	356
Colingsworth, D. R, Saudek, E. C. and Baldwin, I. L. Nitrogen relationships in yeast growth. Abstract	118
Colon and aerogenes groups, The action of hexamethylenetetramine on members of the colon and aerogenes groups	281
— -aerogenes groups, Indol tolerance of certain strains of	211
— group, Hydrogen sulfide production as a differential test in the	65
Comparative, A, study of hemolytic streptococci isolated from the throats of residents of New Orleans and New York	631
— study of two strains of Rocky Mountain spotted fever virus with special reference to the Weil-Felix reaction. Abstract	469
Comparison, A, of the properties of <i>Clostridium butyricum</i> Prazmowski and <i>Bacillus saccharobutyricus</i> von Klecki. Abstract	116
Concanavalin A, Identification of hemagglutinin of jack bean with	227
Conn, H. J. In what genus should the soil non-spore-forming bacteria be placed? Abstract	357
Connecticut Valley Branch, S.A.B. Proceedings	125
